WORK EXPERIENCE

Senior PL/SQL Developer

SIA "Autentica"

10/2016 – Present

RESPONSIBILITIES

- Analysis – Identifying and documenting required changes to provide accurate and detailed estimations
- Development – Designing, creating and deploying software for clients' systems
- Maintenance – Keeping tabs on issues reported within project management tools, resolving any within set deadlines
- Testing – Debugging code, providing additional testing support for clients' business analysts and/or project testers
- Optimization & Refactoring – Evaluation and improvement of poorly designed code, sorting redundancies, making use of industry approved techniques on performance optimization
- Quality Assurance – Validating code of other members of the project, providing feedback and suggestions if required
- Mentoring – Planning and executing meetings, monitoring progress, educating less experienced colleagues on best coding practices
